Experience

Nov 2020 - Present  Ghent

Software Engineer
Oqton

After my internship, Oqton offered me a full time contract which I happily accepted. Oqton is a React based web app. I mainly focus on fixing bugs, maintaining the design-system and building new features. I Created the [oqton.design](#) website which is a showcase for our design-system. In the past, I also worked on the marketing website.

Aug - Nov 2020  Ghent

Internship
Oqton

After graduating, I didn't feel truly ready to search for a full time front-end job. I joined Oqton on a 3 month internship. I'm glad I applied for another internship after graduating as I learned a lot.

Feb - May 2020  Prague

Internship
Data 4 You / BRIKK App

To finish my education I went on an international internship to Prague. During the internship I mostly focused on data scraping real estate websites with NodeJS. I also worked on some small projects in React & Laravel.

Aug 2019  Ghent

Student Job
AZ Sint-Lucas

Student job at AZ Sint-Lucas which is a nearby hospital. I worked in the IT department of the hospital. My main tasks were maintaining, updating the OS and replacing the hard drives of the computers.

2014 - 2017  Ghent

Student Job
Free-Time
